Valley Video - Tips & Tricks

Before calling our office for service, please attempt the following “quick-fixes”. Your need for a service call may be eliminated!

If you do not have a signal or do not have a picture on your TV. . .

- Please reboot the STB (Set-Top-Box)
- To reboot, unplug the STB's power supply from the electrical outlet. Wait 10 seconds and plug the cord back into the outlet.

If rebooting your STB did not restore your service, please reboot the “modem”.

- The modem is a black or grey box with little green lights on the front. It is most likely located in your basement near your other electrical equipment.
- Unplug the modem's power supply from the electrical outlet. Wait 10 seconds and plug the cord back into the outlet.

**Does not apply to FTTF subscribers.

We strive to provide our subscribers with exceptional service. Thank you for choosing Valley Video!
