▶ All About Valley Video

How many TV's can be connected to Valley Video? You may receive 3 "streams" with your Valley Video service, which are included in the package price. *Additional streams may be purchased for \$7.99/per month.*

What is a "stream"? A "stream" is the number of different channels being watched at one time. The "stream" is delivered using set-top boxes, a "converter" box that may connect to a DSL modem and to your television to make the signal viewable on your tv. The maximum number of "streams" per service is three. *Additional streams may be purchased for \$7.99/per month.*

Can I connect additional tv's? Yes, you can connect multiple tv's to the same "stream", however both tv's will need to watch the same channel.

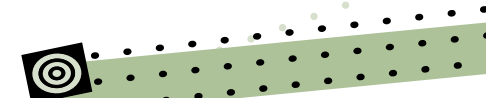

Do I need a special tv to receive Valley Video? No.

Is Valley Video HDTV? The Valley Video system is considered a digital system, but the HD Channels are available in our HD Package at a minimal monthly cost.

Do I need to purchase the Set-Top-Box from Valley? Valley will provide up to three "STB"s per account. The equipment is owned by Valley.

Is there an activation and/or wiring charge for Valley Video? Generally activation and wiring charges apply. Please contact our business office for additional information.

Does Valley offer DVR (Digital Video Recorder) Services? DVR Services are available from Valley for an additional monthly fee.
